60/30 MODULAR WORK TABLE

STUDY TABLE

DESIGN LARS VEJEN, schmidt hammer lassen design

The modular work table has been designed to complement our 60/30 Classic Steel shelving giving us the opportunity to offer a unified look in this series.

The table is available in two versions – a single table with fixed sizes, and an add-on extension version which can be extended in the infinite...

Both versions of the table are double-sided and come with an integrated middle rail for power and built in computer connectors. Cable trays to conceal the wiring are housed below the table. Middle rails as well as cable trays are made of steel.

DIMENSIONS (cm)

Single table (4-6 persons):
W1800 x D1200 x H720 mm

Add-on extension version:
Start – and end module
W1350 x D1200 x H720 mm

Intermediate extension
W900 x D1200 x H720 mm

All table tops (30 mm) are available in linoleum, laminate and all standard woods. The frame is made of 60x30 mm steel tubes and is available in all our standard colours.

Minimum one start – and one end module is required for the add-on extension version.
