FRONTLINE SQUARE

SHELVING & DISPLAY

DESIGN BCI

The Frontline Square can be used for many functions ...

Use it to store a large amount of books on the quadratic shelving system - or as a display, using a combination of both flat and sloping shelves. The top shelving on the Frontline Square allows several usage options - e.g. as a work table, display or a play area. Or why not use it to create and visualise book themes to catch the attention of the visitor!

The Frontline Square design really is multifunctional and can ideally be incorporated into many different environments.

The Frontline Square is available in several variations. Choose between 4 heights ranging from 92 to 182 cm. The shelves are available in 25 and 30 cm and the actual modules are available in lengths of 75 and 90 cm.

Choose between a painted or veneer finish. All standard models are equipped with 8 castors, so you can move the unit to the position you want.
