

SLIMLINE RADIUS

SHELVING SYSTEM
DESIGN NIKLAS DAHLMAN

SLIMLINE RADIUS

Slimline Radius offers various possibilities for creating environmental spaces.

The shelving can be adapted in order to fully utilize the characteristics of the premises.

Build inviting, space efficient circles or exciting, winding shelving bays. There is no end to the possibilities!

The corner shelves in combination with curved top and bottom shelves give the shelving the impression of being round.

The corner shelves also offer excellent opportunities for display.
