Size W495 x D90 x H70 mm.
Material Lacquered steel.
Conditions 
5748 cable sleeve

Environmentally friendly study table!

A new concept in tables. Innovation and planning combine to provide functionality whilst protecting the environment; consideration has been given to both your library space, and our finite resources.

Page

Lightweight study table – weighs only 10 kilos! Easy to move, group together, and stack on top of each other. Can be stand-alone, placed next to each other in pairs or in islands of four tables. Available in two finishes.

Material Wellboard (from recycled cardboard) reinforced with solid wood edges. Surface in lacquered birch veneer; natural or white stained.

Design Marie-Louise Gustafsson.

4391 natural

4392 white stained

Well board is a board material based entirely on paper with extremely high bending strength in relation to its own weight. The well board material is a sandwich construction where the honeycomb type core layer is based on corrugated cardboard. The material is environmentally friendly, largely built of reused paper fibre and conventional paper glue and is recyclable. Please note that the table is strengthened with strips of solid wood and can carry a load of up to 125 kg. We however strongly recommend against sitting on the table.

Tables for everyone!

Tables

Handy multi-purpose tables; for reading, conferences, computers or as a working table. Stand-alone or in combinations, see pictures below.

Material Square tube, lacquered stand in steel. Birch finish covered tabletop on particle board.

Design Schulz Speyer.

AxLibris Frontdesk

Counters often have limited access for visitors because the front is screened off, but at AxLibris the front is recessed under the tabletop. This design makes it easier for wheelchair-bound visitors to come closer and achieve better contact with the person on the other side of the counter.

Frontdesk
 Smaller visitor or information counter with overhanging tabletop in two versions: fixed or adjustable-height.
